NETGEAR®
16-port Gigabit Switch
10/100/1000 Mbps GS116

Installation Guide
Introduction

The NETGEAR® 16-port Gigabit Switch Model GS116 provides you with a low-cost, reliable, high-performance switch to connect up to sixteen different Ethernet-enabled devices (such as computers, file servers and routers) at blazing Gigabit Ethernet speeds.

Installation Overview

Estimated Time: 5–10 minutes

1. Unpack the box and verify the contents.
2. Prepare to install the switch.
3. Install the switch and connect the other devices.

1 Unpack the Box and Verify the Contents

When you open the box, verify that you received everything. The package includes:

- 16-port Gigabit Switch GS116
- AC power adapter
- Wall-mounting screws
- GS116 Installation Guide (this document)
- Warranty/support information card

If you don’t have everything listed above, see the support information card for contact information. If you’re missing the support information card itself, get contact information at www.NETGEAR.com in the Technical Support section.

2 Prepare to Install the Switch

Decide where you want to place the switch. Find a flat horizontal surface — such as a table, desk or shelf. The switch comes with wall-mounting screws. You’re welcome to use the screws if you want to hang the switch in an open space on a wall.
The corresponding Link LED for each connected and powered device should light when
connected and flash when activity occurs. If the connection is 10 Mbps or 100 Mbps, one
of the LEDs in the RJ-45 jack will light up. If the connection is 1000 Mbps, the both of
the LED’s in the RJ-45 jack will light up.

Note: If any light doesn’t operate as indicated, go to the Troubleshooting section.

Troubleshooting

The Power light is not lit

The switch has no power.

• Make sure the power cord is properly connected to the switch.
• Make sure the power adapter is properly connected to a functioning power outlet. If it’s in
a power strip, make sure the power strip is turned on. If the socket is controlled by a light
switch, make sure the switch is in the on position.
• Make sure you are using the NETGEAR power adapter supplied with your switch.

The Port number light is not lit for a connected device or stays on continuously

There’s a hardware connection problem.

• Make sure the cable connectors are securely plugged in at the switch and the device.
• Make sure the connected device is turned on.
• If the Ethernet cable is connected to a NIC or other Ethernet adapter, make sure the card
or adapter is installed correctly and is working.
• Make sure the cable is less than 328 feet (100 meters).
**Technical Specifications**

**Standards Compatibility:**
- IEEE 802.3i 10BASE-T Ethernet, IEEE 802.3u 100BASE-TX
- Fast Ethernet, 1000BASE-T Gigabit Ethernet
- IEEE 802.3x Flow Control, IEEE 802.1p and TOS priority, WRR scheduling, four queues

**Network Interface:**
- RJ-45 connector for 10BASE-T, 100BASE-TX, or 1000BASE-T

**Power:**
- 25 W max and 5 V @ 5A DC input

**Physical Dimensions:**
- W: 285 mm (11.22 in)  
  - D: 103 mm (4.06 in)  
  - H: 27 mm (1.06 in)

**Weight:**
- 0.9 kg (2 lbs)

**Operating Temperature:**
- 0 to 40° C (32 to 104° F)

**Operating Humidity:**
- 10% to 90% relative humidity, non-condensing

**Electromagnetic Compliance:**
- CE mark, Commercial FCC Part 15, Class A EN 55 022 (CISPR 22), C-Tick

**Safety Agency Approvals for the Power Adapter:**
- CE mark, Commercial UL listed (UL 1950), C-Tick

**Performance Specifications**

**Frame Filter Rate:**
- 14,800 frames/sec max for 10M port / 148,800 frames/sec max for 100M port / 1,488,000 frames/sec for 1000M port

**Frame Forward Rate:**
- 14,800 frames/sec max for 10M port / 148,800 frames/sec max for 100M port / 1,488,000 frames/sec max for 1000M port

**Network Latency:**
- 100 Mbps to 100 Mbps: 40 µs max
- 1000 Mbps to 1000 Mbps: 10 µs max (using 64-byte packets)

**Address Database Size:**
- 8000 MAC addresses

**Addressing:**
- 48-bit MAC address

**Queue Buffer:**
- 512 kilobytes per port

---

**Statement of Conditions**

In the interest of improving internal design, operational function, and/or reliability, NETGEAR reserves the right to make changes to the product described in this document without notice.

NETGEAR does not assume any liability that may occur due to the use or application of the product(s) or circuit layout(s) described herein.

**Certificate of the Manufacturer/Importer**

It is hereby certified that the NETGEAR Model GS116 Gigabit Ethernet Switch has been suppressed in accordance with the conditions set out in the BMPT-AmtsblVfg 243/1991 and Vfg 46/1992. The operation of some equipment (for example, test transmitters) in accordance with the regulations may, however, be subject to certain restrictions. Please refer to the notes in the operating instructions.

Federal Office for Telecommunications Approvals has been notified of the placing of this equipment on the market and has granted the right to test the series for compliance with the regulations.

**Federal Communications Commission (FCC) Compliance Notice:**

**Radio Frequency Notice**

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference.
- This device must accept any interference received, including interference that may cause undesired operation.

**Note:** This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

**EN 55 022 Declaration of Conformance**

This is to certify that the NETGEAR Model GS116 Gigabit Ethernet Switch is shielded against the generation of radio interference in accordance with the application of Council Directive 89/336/EEC, Article 4a. Conformity is declared by the application of EN 55 022 Class A (CISPR 22).

**Canadian Department of Communications**

**Radio Interference Regulations**

This digital apparatus (NETGEAR Model GS116 Gigabit Ethernet Switch) does not exceed the Class A limits for radio-noise emissions from digital apparatus as set out in the Radio Interference Regulations of the Canadian Department of Communications.

**Règlement sur le brouillage radioélectrique du ministère des Communications**

Cet appareil numérique (NETGEAR Model GS116 Gigabit Ethernet Switch) respecte les limites de bruits radioélectriques visant les appareils numériques de classe A prescrites dans le Règlement sur le brouillage radioélectrique du ministère des Communications du Canada.
Technical Support

PLEASE REFER TO THE SUPPORT INFORMATION CARD THAT SHIPPED WITH YOUR PRODUCT.

By registering your product at www.NETGEAR.com/register, we can provide you with faster expert technical support and timely notices of product and software upgrades.
