1. Connect the Type-C Multi-Port Adapter to Type-C port of your Macbook. Compatible with 2016/2017 MacBook and 2016/2017 MacBook Pro. 

2. Connect native Macbook charger to pass through port to charge your Macbook. Blue LED indicates that Adapter is powered. 

3. Connect external monitor to HDMI port of the Adapter with HDMI Cable. HDMI port requires a direct HDMI to HDMI connection. Not recommended with VGA/DVI monitors. 

4. Connect Ethernet Cable to Ethernet Port. 

5. Connect USB HDD/SSD/Thumb or any USB Device to USB Type-A ports. Not compatible with Apple SuperDrive. 

6. Charge phones through USB ports of the Adapter using native charging cables. 

7. Attach either Micro SD or SD Card to appropriate slot of the Adapter. 

NOTE: OPERATING TEMPERATURE IS 86-122°F
