**RUT955 LTE Router**

Quick start guide v2

**Translation:**

This sign on the package means that it is necessary to read the User's Manual before you start using the device.

This sign on the package means that all used electronic and electric equipment should not be mixed with general household waste.

Hereby, Teltonika declares that this RUT230 is in compliance with the essential requirements and other relevant provisions of Directive 1999/5/EC.

Please visit our web site [www.teltonika.lt](http://www.teltonika.lt) for more information.

**ISO 9001**

**CERTIFIED ORGANISATION**

**LTE** is a trade mark of ETSI
Hardware installation

1. Remove back panel and insert SIM cards which were given by your ISP (Internet Service Provider) and micro SD card. Correct SIM cards’ orientation is shown in the picture.

2. Attach LTE, GPS and WiFi antennas.

3. Connect the power adapter to the socket on the front panel of the device. Then plug the other end of the power adapter into a wall outlet or power strip.

4. Connect to the device wirelessly (SSID: Teltonika_Router) or use Ethernet cable and plug it into any LAN Ethernet port.

Configure your computer (using Windows)

1. Enable the wireless network connection (go to Start > Control Panel > Network and Internet > Network and Sharing Center). In the left panel click Change adapter settings link. Right click on Wireless Network Connection and select Enable).

3. Select Obtain IP address automatically and Obtain DNS server address automatically if they are not selected. Click OK.

4. Right click on Wireless Network Connection and select Connect/Disconnect to see available wireless networks.

5. Choose the wireless network Teltonika_Router from the list and click Connect.
