Ports

**Locking Notch**  The *Locking Notch* will be used with the *Mounting Bracket* to help secure the UniFi AP. (This is described further in the *Mounting Bracket* section.)

**Ethernet**  This Gigabit Ethernet port is used to connect the power and should be connected to the LAN and DHCP server. Power can be provided by a Ubiquiti Networks UniFi Switch or *Gigabit PoE* adapter (included with single-pack only).

**Reset**  The *Reset* button serves two functions for the UniFi AP:

- **Restart**  Press and release the *Reset* button quickly.
- **Restore to Factory Default Settings**  Press and hold the *Reset* button for more than five seconds.

Alternatively, the UniFi AP may be reset remotely via a *Reset* button located on the bottom of the *Gigabit PoE* adapter.

**Cable Feed Plug**  If your Ethernet cable feeds along the mounting surface, remove the *Cable Feed Plug*. 
Locking Tab  During installation, the Locking Tab on the Mounting Bracket moves from the Initial Position to the Final Position, where the Locking Tab fits securely into the Locking Notch on the UniFi AP to help prevent theft.

Note: If you need to remove the UniFi AP from the Mounting Bracket, insert a paper clip in the Slot to release the Locking Tab and turn the UniFi AP counterclockwise.
Hardware Installation

The UniFi AP can be mounted on the wall or ceiling. Perform the steps for the appropriate installation:

Wall Mount

1. Position the *Mounting Bracket* at the desired location on the wall with the arrow pointing up.

2. Use a pencil to mark the four mounting holes. Use a 6 mm drill bit to drill the mounting holes.

3. If your Ethernet cable feeds through the wall, then cut or drill a circle approximately 18 mm in diameter. Then feed the CAT5/6 cable through the hole.

*Note:* 25 mm is the distance from the center of the bottom mounting hole to the center of the cable hole.
4. Insert the **Screw Anchors** into the 6 mm holes. Secure the **Mounting Bracket** to the wall by inserting the **Screws** into the anchors.

5. If the Ethernet cable runs along the mounting surface, remove the **Cable Feed Plug**.
6. Connect the Ethernet cable to the *Ethernet* port.

7. Align the arrow on the UniFi AP with the arrow on the *Locking Tab* of the *Mounting Bracket*.
8. Ensure that the UniFi AP is firmly seated on the *Mounting Bracket*. Turn the UniFi AP clockwise until it locks into place and the *Locking Tab* fits securely into the *Locking Notch*. 
Ceiling Mount

1. Remove the ceiling tile.

2. Place the *Ceiling Backing Plate* in the center of the ceiling tile. Mark the four mounting screw holes.

3. Mark a hole approximately 18 mm in diameter for the Ethernet cable feed.

   ![Diagram showing hole marked 25 mm from bottom mounting hole]

   **Note:** 25 mm is the distance from the center of the bottom mounting hole to the center of the cable hole.

4. Use a 3 mm drill bit to drill the screw holes, and cut or drill the hole for the Ethernet cable feed.
5. Insert the *Flat Head Screws* through the *Mounting Bracket*, ceiling tile, and *Ceiling Backing Plate*. Fasten the screws using the *Keps Nuts*. Then feed the Ethernet cable through the 18 mm hole.
6. Connect the Ethernet cable to the *Ethernet* port.

7. Align the arrow on the UniFi AP with the arrow on the *Locking Tab* of the *Mounting Bracket*. 
8. Ensure that the UniFi AP is firmly seated on the *Mounting Bracket*. Turn the UniFi AP clockwise until it locks into place and the *Locking Tab* fits securely into the *Locking Notch*.

9. Set the ceiling tile back into place.

**Powering the UniFi AP**

Use a UniFi Switch or a *Gigabit PoE* adapter for power.

**Connecting to a UniFi Switch**

Connect the Ethernet cable from the UniFi AP directly to a PoE port on the UniFi Switch.
Connecting Power over Ethernet

The single-pack of the UAP-AC-LITE includes one Gigabit PoE adapter. For multi-pack units, we recommend using a UniFi Switch.

1. Connect the Ethernet cable from the UniFi AP to the adapter’s POE port.
2. Connect an Ethernet cable from your LAN to the adapter’s LAN port.
3. Connect the Power Cord to the adapter’s power port. Connect the other end of the Power Cord to a power outlet.

Mounting the PoE Adapter (Optional)

1. Remove the PoE Mounting Bracket from the adapter, place the bracket at the desired location, and mark the two holes.
2. Pre-drill the holes if necessary, and secure the bracket using two fasteners (not included).
3. Align the adapter’s slots with the tabs of the PoE Mounting Bracket, and then slide the adapter down.
Software Installation

Download and install the latest version of the UniFi Controller software at: downloads.ubnt.com/unifi

Launch the software and follow the on-screen instructions. Step-by-step instructions are available in the User Guide located on our website: documentation.ubnt.com/unifi

After you have installed the software and run the UniFi Installation Wizard, a login screen will appear for the UniFi Controller management interface. Enter the Admin Name and Password that you created and click Login.

You can manage your wireless network and view network statistics using the UniFi Controller management interface. For information on configuring and using the UniFi Controller software, refer to the User Guide.
